

## *Summer school*

The Summer school of the Russian language in the SSU has been welcoming international high school student for over 20 years and during the whole period has been very popular among them. During this time the students from the United States of America, Turkey, France, Spain, Azerbaijan and other countries have joined this Program.

Students from different universities and countries get the unique opportunity to work together in the process of learning Russian as a Foreign Language by taking part in this program and create unforgettable community of friends each summer.

Students enjoy a daily schedule that combines intellectual and curricular adventure, cultural enrichment as they take intensive and practical grammar course of the Russian language, video course "Watch Russian film and study the Russian language", read Russian literature. The total immersion into the language environment which is used in the Summer Language school helps to overcome the psychological language barrier: students live in Russian families and try to socialize only in Russian.

At the end of the program, students usually have the opportunity to travel by boat down the Volga River to Moscow where they are offered unsurpassed opportunities for cultural exploration and adventure in such Russian culture-historical centers as Samara, Kazan, Yaroslavl and Nizhny Novgorod.

We do our best to ensure that all our students make the most of their time in Russia.
